

Evaluation of project “Integrated fisheries development in Tiguent”, Mauritania

Date: 2004-2005

Location: Mauritania

Funding source: Spanish Secretariat of International Cooperation

Companies Involved: Canaest, S.L

Description of Work

In October 2001 the project “Integrated Development Pole in Tiguent” was formulated upon request of Mauritanian Government. The implementation time was set in three years. Canaest-Consulting was charged with the mid-term evaluation of the project, counting with the support of two local consultants.

The objectives of the evaluation were the following:

- Evaluate the results of the project, mainly in relation to the efficiency criteria;
- Analyse the degree of consecution of the general objective of the project: to improve the living conditions of Tiguent population; and the more specific objective of valuing the coastal resources through the activities foreseen;
- Analyse the situation of the intervention in order to give valuable recommendations and possible reformulations for the following phase of the project.
