

Preidentification of fisheries development projects in Guinea Bissau

Date: 2004

Location: Guinea Bissau

Funding source: Spanish Agency of International Cooperation

Companies Involved: Canaest, S.L

Description of work

The Spanish Technical Cooperation Office of Dakar entrusted Canaest to make and analyse of fisheries sector in Guinea Bissau in order to propose future interventions in that country. The results were 6 lines of action and 6 fields of intervention identified:

- a) Production: Fisheries development project in Bubaque and Cacheu.
- b) Commercialisation and transformation: Creation of a commercialisation system unit in the continental area of the country.
- c) Sustainability and interaction with other activities: Integral project in the Biosphere reserve of Bolama-Bijagos (fisheries and sustainable tourism)
- d) Training: Consolidation of the National Professional Training Centre of Bolama.
- e) Research: Strengthening of the Fisheries Applied Research Centre (CIPA)
- f) Support the Fisheries Ministry management capacity: Provide technical assistance and materials to the Fisheries Ministry
