

Cost-benefit analysis of UE fisheries agreement concluded with Senegal

Date: 2004

Location: Spain and Senegal

Funding source: Spanish Secretariat of Marine Fisheries

Companies Involved: Canaest, S.L

Description of work

Canaest-Consulting thanks to our privileged position in Senegal with an office in Dakar and contacts in the fisheries sector in Spain and Senegal, made a complete a evaluation study of costs and benefits derived from the EC fisheries agreement with Senegal. The study included the following contents:

- Characteristics of the fleet operating under the agreement
- Exploitation costs
- First sale captures value
- Induced effect in the ports of origin
- Impacts of the fisheries agreement in Senegal and its fishing sector.

Besides the work carried out in the port of Dakar, an extensive fieldwork was made in some of the more relevant Spanish ports: Bermeo, Vigo, Marín and Huelva.
